🐙 medmsd

PROFILE

Backend-focused Java engineer specializing in scalable distributed systems using Spring Boot and Kubernetes. Experienced in designing secure OAuth2 architectures and migrating production systems to cloud-native infrastructure. Delivered production systems serving 10,000+ users with optimized performance, secure authentication, and automated CI/CD pipelines.

KEY ACHIEVEMENTS

- Led migration of 8+ microservices to Kubernetes-based infrastructure ensuring minimal service disruption during migration
- Built centralized OAuth2 authentication system supporting 5+ applications and 50,000+ daily requests
- Delivered backend platform serving 10,000+ users in production with high availability and secure access control
- Reduced deployment time by 70% through CI/CD automation

PROFESSIONAL EXPERIENCE

Backend Engineer, Byrsa-Tech

08/2021 – present | France, Remote

- **Cloud Infrastructure Migration**
 - Led migration of 8+ microservices to Kubernetes-based infrastructure, defining containerization strategy and deployment architecture
 - Reduced deployment time by 70% by implementing automated CI/CD pipelines
 - Optimized Kubernetes resource allocation and autoscaling strategies to improve system stability under load
- **Defmarket – Benefits App**
 - Designed and implemented OAuth2-based authentication and Role-Based Access Control system (RBAC), defining access control strategy for a platform serving 10,000+ users
 - Reduced API response time by 35% through query optimization and caching strategies
 - Integrated Stripe payment system handling high transaction volume with secure and reliable processing
- **OAuth2 Authorization Server**
 - Architected centralized OAuth2 authentication system for 5+ applications, handling 50,000+ daily requests and standardizing access control across services and simplifying cross-application access control
- **Real Estate Management Web App**
 - Designed and developed backend-driven web platform with server-side rendering, optimizing data fetching and response times
 - Reduced page load time by 50% through optimized architecture and rendering strategy
 - Implemented scalable filtering system supporting thousands of listings with efficient query handling

TECHNICAL SKILLS

- **Languages:** Java, Python, TypeScript, SQL
- **Backend:** Spring Boot, Spring Security, Spring Authorization Server, Hibernate
- **Frontend:** Angular, Vue.js (Quasar)
- **DevOps:** Docker, Kubernetes, Jenkins, CI/CD
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis
- **Security:** OAuth2, JWT, RBAC
- **Tools:** Git, Maven, Gradle

CORE COMPETENCIES

- **Project Frameworks:** Agile Methodologies (Scrum/Kanban)
- **Leadership:** Team Leadership, Mentoring, Stakeholder Communication.
- **Documentation:** Technical Documentation, API Documentation (Swagger/OpenAPI), System Architecture Design.

EARLY PROJECTS

Timesheet Management PaaS, DSO Services

- Built multi-role timesheet platform with role-based access control, automating reporting and scheduling workflows

Kubernetes YAML Generator Web Tool, SiFAST

- Developed web tool to generate Kubernetes configuration files, reducing manual errors in deployment setup

COVID-19 Charity App, International Institute of Technology

- Developed real-time donation platform using Firebase, enabling processing of 500+ donations with live tracking

EDUCATION

Software Engineer, International Institute of Technology

09/2018 – 07/2021 | Sfax, Tunisia

Bachelor's Degree in Computer Science and Multimedia, Higher Institute of Computer Science and Multimedia

09/2015 – 07/2018 | Sfax, Tunisia

CERTIFICATES

Big Data Engineer (IBM)
